

Features of File Validation Utility (FVU) version 2.126

Form Type	Type of return	Validation
Form 24Q, 26Q, 27Q, 27EQ	Regular as well as Correction	BSR Code mentioned in challan details should be valid one (i.e. it must be present in BSR Code Master), if invalid BSR Code is present in file, FVU will generate warning file containing details of only invalid BSR Codes.
Form 24Q, 26Q, 27Q, 27EQ	Regular as well as Correction	PAN of deductor and its underlying deductees should not be the same, if same PAN for both deductor and deductee is present in file, FVU will generate warning file containing details of those records where the deductor and deductee PAN is same.
